

Session Note - March 18, 2026

Patient: Jennifer Walsh

Therapist: Dr. Michael Chen, PsyD

Presenting Concerns:

Patient originally presented with adjustment disorder related to divorce, now largely resolved. Severity is mild at this point. Concerns have been ongoing for eight months but symptoms have significantly decreased. No new concerns this session.

Session Summary:

Termination planning session. Reviewed progress made throughout 16 sessions of therapy. Patient reflected on gains in emotional regulation and boundary-setting skills. Discussed strategies for maintaining progress independently. Created relapse prevention plan identifying warning signs and coping strategies. Patient expressed gratitude and confidence about managing independently.

Mood Assessment:

Current mood: 8/10 (positive and confident)

Mood change from last session: Improved

Energy level: Normal

Emotional themes: gratitude, confidence, mild apprehension about ending therapy

Affect observed: Bright and engaged

Affect congruence: Congruent

Mental Status Examination:

Appearance: Well-groomed

Behavior: Cooperative and engaged

Speech: Normal

Thought process: Linear and organized

Thought content: Future-oriented, reflecting on progress

Perception: No abnormalities

Cognition: Intact

Insight: Good - clear understanding of gains and ongoing needs

Judgment: Good

Risk Assessment:

Suicidal ideation: None. Self-harm: None. Homicidal ideation: None. Risk level: Low.

Interventions Used:

- Relapse prevention planning
- Psychoeducation about maintaining gains
- Supportive therapy

Techniques were very effective - patient articulated clear plan for independence.

Skills practiced: Identifying warning signs, reviewing coping toolkit

Homework assigned: Implement relapse prevention plan and schedule follow-up if needed

Previous homework: Completed - practiced all assigned coping strategies successfully

Medications: Not applicable

Diagnoses:

Primary diagnosis: Adjustment Disorder with mixed anxiety and depressed mood, resolved

Primary diagnosis code: F43.23

Diagnosis status: Updated - symptoms have resolved

Treatment Progress:

Overall progress: Significant improvement across all treatment goals

Treatment phase: Termination

Barriers: Mild apprehension about ending therapy

Strengths: Strong coping skills, good social support network, self-awareness

Treatment goals: Emotional regulation, boundary setting, adjusting to post-divorce life

Goals addressed: All goals reviewed and progress consolidated

Plan:

- Final session - therapy concluded
- Discharge planned with option to return if needed
- No further regular sessions scheduled
- No referrals needed
- Level of care: Outpatient - completed
- Discharge planning: Ready for discharge
